

Mercedes E class (W210) Audio/Visual Options

BRAYBROOK'S
IN-CAR AUDIO/VISUAL

Why choose Braybrook's?

Braybrook's have been at the forefront of in-car technology for over 20 years. It has taken dedication, commitment and constant attention to detail to become the leading supplier to over 80 main dealerships across the UK. By specialising in specific brands you can be assured of a more informed quotation and installation. Our levels of customer service are exemplary and our equipment choice ensures longevity and reliability. All of our high quality installations include:

- Fully trimmed headrest installation. No 'creases or bulges' in the leather.
- Quality branded equipment - Not cheap imported product.
- Professional Installation - We GUARANTEE no squeaks and rattles.
- Fully independent wiring - Will not affect the cars existing systems or warranty

To illustrate the attention to detail of a Braybrook's installation these are a few of the smaller details that are always included:

TESA Cloth tape. All of our harnesses are wrapped in this soft tape to alleviate any rattles or chaffing.

Genuine Parts. All of our 'Retrofit' installations use all genuine parts fitted in an identical manner to that of factory build.

Video Amplifiers. Wherever a picture requires splitting to more than one screen this is achieved by using dedicated video buffer/amplifiers. This ensures the best possible picture on every screen.

Braybrook's now offer a mobile service to many areas. Please ask if we cover your area. (An additional charge may apply)

The following pages outline just a few of the possible combinations of equipment available for your Mercedes. Please contact a member of our sales team to arrange a consultation or demonstration to suit your specific requirements.
